

Single Channel Mist Controller Model 1A

The single channel mist controller is great for single zone misting benches. It can also be used on ebb and flow benches and other hydroponic setups that need frequent watering schedules. The controller is provided with a 24 volt AC wall-mount transformer which provides safe operation and an output of 24 volts needed for most solenoid valves.

- The "seconds of on time" knob allows for 2, 4, 6, 8, 10, 12, 15, 20, 30, 40, 50, and 60 seconds of mist.
- The "minutes between on time" knob allows for 2, 4, 6, 10, 15, 20, 30, 60, and 120 minutes between mist cycles.
- An "on" and "off" is provided for manual control of the solenoid.
- Great for propagation houses, small hobby growers and hydroponic growers.
- Can be used with a relay for voltages of 120vac or 240vac depending on the relay being used.
- The Phytotronics mist controller is built with the same standards as the other famous mist clocks we offer.
- At a glance design provides a safe, reliable, easy to use and easy to understand misting controller.
- One year warranty.
