## Mist Controllers – “At A Glance™” Technology

### Electronic Leaf

- Simple and effective way to mist cuttings
- Works on the principle of evaporation. The weight of mist on the metal screen controls solenoid operation
- 24 volt output, 40 VA, 120 volt in
- 24-volt plug-in transformer with 20' of cord included
- 20' of 18/2 wire for solenoid valve connection also included
- Housing made with durable stainless steel
- Green LED light indicates power is provided to the electric leaf
- Blue LED light indicates power is supplied to the solenoid valve
- 2 year warranty

#### 1400 Electronic Leaf

### TRIDENT - T3A - 1-Zone Controller

- Sturdy non-metallic enclosure, UV protected, resists moisture and chemicals
- Toggle switch to select ON/OFF time mode, second/minute, minute/minute, and minute/hour
- 2-to 60-second or minute ON time, and 2-to 180-minute or hour OFF time
- Extra bright LEDs show ON/OFF times when programming and when controller is in use
- 24 hour digital clock, with 8 programmable events to turn on/off controller
- 2 year warranty
- Includes 24 VAC plug-in Transformer and 20' cord

#### 1095 Trident T3A - 1 Zone Controller

### NOVA - 1626ET - 6-Zone Controller

- Sturdy non-metallic enclosure, UV protected, resists moisture & chemicals
- Seconds on, minutes off settings
- 1x, 2x, 3x time extender toggle switch
- One connection for the common wire
- 24 hour digital clock, with 8 programmable events to turn controller off
- Includes 24VAC plug-in transformer
- 2 year warranty

#### 1405 Nova 1626ET - 6 Zone Controller

### SUPER NOVA - 12B 12-Zone Controller

- Sturdy non-metallic enclosure, UV protected, resists moisture & chemicals
- Seconds on, minutes off settings
- 1x, 2x, 3x time extender toggle switch
- One connection for the common wire
- 24 hour digital clock, with 8 programmable events to turn controller off
- Includes 24VAC plug-in transformer
- 2 year warranty

#### 1420 Super Nova 12B - 12 Zone Controller

**Please Note:** We no longer repair controllers 1626A, B, C or 120Volt 1626D, Gemini 4-Hour, or Gemini 2

## Misting & Water Controllers

### Mini-Mist

- 2 stations
- Timed operations with internal digital clock
- Misting and irrigation
- Each station can be individually set for operation times, watering days, and repeat functions
- Night detection sensor
- 24VAC input/output, supplied with plug in 24V transformer and power cord
- Weatherproof lockable non-metallic case with clear cover
- 1 yr warranty

**5402 Mini-Mist**

### Water Max

- 12 independent stations
- Timed operations with internal digital clock
- Misting and irrigation
- Each station can be individually set for operation times, watering days, and repeat functions
- Night detection sensor
- 24VAC input/output, supplied with plug in 24V transformer and power cord
- Weatherproof lockable non-metallic case with clear cover
- 1 yr warranty

**5400 Water Max**

### Water Plus VPD

- 12 independent stations
- Continuous Vapor Pressure Deficit adjustments
- You set the on time, seconds or minutes
- The controller determines the off time based on current conditions and VPD value you set
- 24V transformer and power cord included, 24VAC output
- Night watering disable functions
- Includes all of the other features of the Water Max
- 1 yr warranty

**5404 Water Plus VPD**

### Water Pro VPD

- 12 zones, expandable to 24 zones with expansion unit
- Includes 1 VPD sensor and able to except a 2nd VPD sensor
- Can be connected to a remote PC and used with the optional Growlink software for sensor data logging and remote control operation
- Crop aging adjustments
- End of schedule alarm
- Night watering disable functions
- 24V transformer and power cord included, 24VAC output
- 1 yr warranty

**5406 Water Pro VPD**

**5412 VPD Sensor**

### VPD = Vapor Pressure Deficit

VPD = Vapor Pressure Deficit. VPD is the difference between the amount of moisture in the air and how much moisture the air can hold. The Water Plus VPD and Water Pro VPD controllers use the VPD to automatically adjust the length of the mist or irrigation "off" cycle.

5412 VPD Sensor

VPD Sensor

## The Galaxy System

### Wireless Devices for Horticulture

#### AT101 Remote Monitoring Hub

##### Product Overview and Operation:

- The AT101 provides network access to any AT200 sensors within range.
- An internal web server will display current sensor data on any browser and also send email/text alerts when individual sensor's data exceeds user-determined setpoints.
- You can also transmit sensor data via XML strings to a cloud server. Charting software can then access the cloud data and present this information in a graphical manner.
- At least one AT101 is required per monitoring system.

##### In the box

- AT101 Hub with detachable antenna
- 100-240VAC Wall Power Adapter with 6' cable
- 14' Ethernet cable

##### Electrical:

Input Voltage: 9VDC  
Input Current: 1.2A

##### Enclosure:

Width: 4.125"  
Height: 1.25" (add 6" with antenna installed)  
Depth: 2.375"

##### Wall Adapter (provided):

Input Voltage: 100 - 240VAC  
Input Frequency: 50 - 60Hz  
Input Current: 0.31A Max

##### Network:

10/100baseT RJ45 to Router or Switch  
433MHz Receiver with range up to 300'  
Simple network setup via DHCP

#### 1061 Galaxy Monitoring Hub

#### AT300 Starter Kit

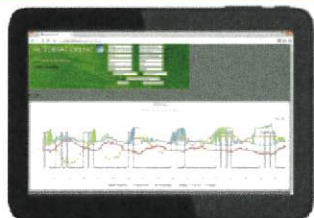

##### AT300 Starter Kit

Included are:

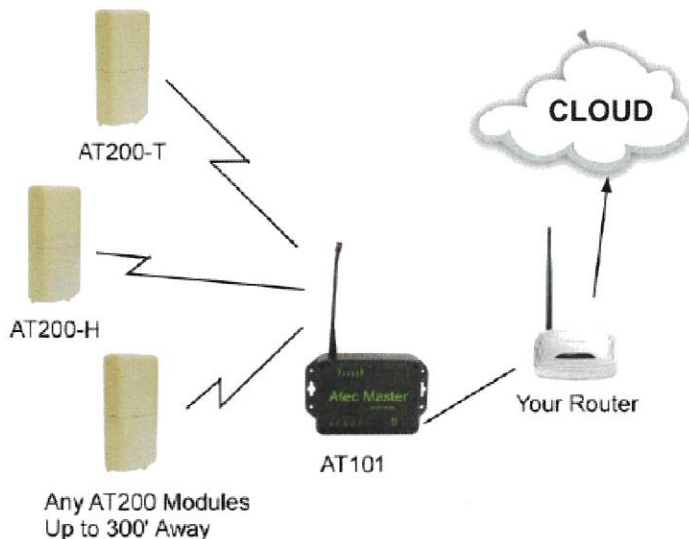

- AT101 Hub
- AT200-T Temperature Sensor
- AT200-RT Remote Sensor Probe

Everything to begin logging data.

#### 1060 Quick Start Kick

Your Tablet, Laptop or Phone

### How It Works

- Step 1:** Plug AT101 into your router or switch
- Step 2:** Install batteries in AT101
- Step 3:** Log into Atec's webpage
- Step 4:** Enter AT200 serial numbers and monitor data

##### AT200-RT Remote Temperature Probe

External 3' probe for AT-200T, for use when the area needing to be sensed may block the signal of the AT200-T to the AT101.

#### 1070 AT200-RT Remote Temperature Probe

## The Galaxy System Sensors

### Product Overview & Operation:

The AT200 sensors will communicate with any AT101 hub within range. A simple "learn" process pairs the sensor to the hub. Once this is completed, data will be immediately available on the hub's webpage and in the AT101 cloud. Designed, Manufactured and Supported in the USA!

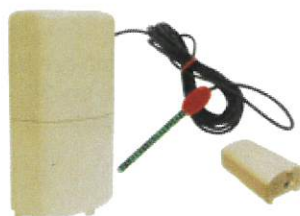

#### AT200-SW Soil Tension Water Sensor

The sensor consists of a pair of highly corrosion resistant electrodes that are embedded within a granular matrix. A current is applied to obtain a resistance value. The transmitter correlates the resistance to Centibars (kilopascals) of soil water tension, designed to be a permanent sensor, placed in the soil to be monitored. Internally installed gypsum provides some buffering for the effect of salinity levels normally found in irrigated agricultural crops and landscapes.

- 0-200 Centibar range
- Will not dissolve in soil and is rain proof
- Not affected by freezing temperatures
- Internal compensation for commonly found salinity levels
- No maintenance

#### 1071 AT200-SW Soil Tension Water Sensor

#### AT200-SV Volume Soil Moisture Sensor

The volume soil moisture sensor measures the dielectric constant of the soil using transmission line techniques, it is insensitive to water salinity, and will not corrode over time. Cable lengths of 4 meters.

- Measures volumetric water content (VWC) or gravimetric water content (GWC)
- Can be buried and is water proof
- Probe is long and slender for wider use, including smaller potted plants

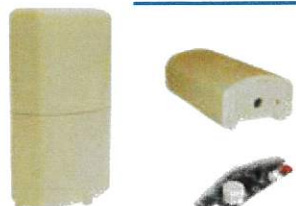

#### 1072 AT200-SV Volume Soil Moisture Sensor

#### AT200-T Temperature Sensor

Data is sampled every 30 seconds and transmitted every 6 minutes unless there is a +/- 10% change. If there is a change in data, it will be transmitted immediately. A 6' remote probe is available (AT200-RT) to sample data in precise areas. -40 to 85°C

#### 1063 AT200-T Temperature Sensor

#### AT200-H Humidity (%RH) Sensor

Data is sampled every 30 seconds and transmitted every 6 minutes unless there is a +/- 10% change. If there is a change in data, it will be transmitted immediately. 5-95% RH - 5% Accuracy

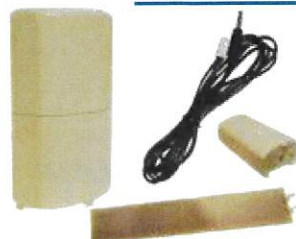

#### 1064 AT200-H Humidity Sensor

#### AT200-L Light Sensor

Data is sampled every 30 seconds and transmitted every 6 minutes unless there is a +/- 10% change. If there is a change in data, it will be transmitted immediately. Data reports 0-100

#### 1066 AT200-L Light Sensor

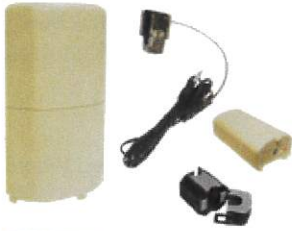

#### AT200-W Water Leak Detection

The included sensing pcb/probe may be placed flat on the floor to sense the presence of water. Data is sampled every 30 seconds and transmitted every 6 minutes unless there is a change. If there is a change in data, it will be transmitted immediately. Data reports 0-100

#### 1067 AT200-W Water Leak Detection

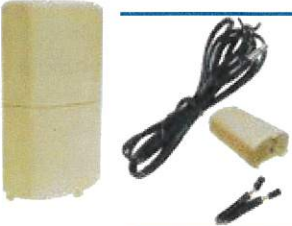

## The Galaxy System Sensors (Continued)

### AT200-CT A/C Current Flow Sensor

The included clamp on probe simply attaches to a wire of the device to monitor. For example, attach to a wire on a furnace fan to monitor. For example, attach to a wire on a furnace fan to monitor when the fan motor is running. Current threshold levels for triggering are jumper selectable within the sensor. Data is sampled every 30 seconds and transmitted every 6 minutes unless there is a +/- 10% change. If there is a change in data, it will be transmitted immediately. Data reports 0-30A

### 1062 AT200-CT A/C Current Flower Sensor

### AT200-V Analog DC Voltage Sensor

May be attached to a backup batteries to monitor voltage levels. Data is sampled every 30 seconds and transmitted every 6 minutes unless there is a +/- 10% change. If there is a change in data, it will be transmitted immediately. 0-30VDC - 0.1V

### 1065 AT200-AD Analog DC Voltage Sensor

### AT200-C Contact Closure Sensor

Senses and reports status of any dry contact switch. A simple magnetic reed switch can be attached to sense whether a window or door is open or closed. Data is sampled every 30 seconds and transmitted every 6 minutes unless there is a change. If there is a change in data, it will be transmitted immediately.

### 1068 AT200-C Contact Closure Sensor

## Redi-Heat™ Mats

### Redi-Heat™ Heavy-Duty Propagation Mats

- RDT-4 or RHT-2 Thermostat required
- 2-Year Warranty and made from thick, flexible rubberized PVC in Phyto Blue
- Provides even, constant heat to root zone for flats and pots
- Designed for use on greenhouse benches or any flat surface
- Easy to install, economical to operate and portable
- Mats come with a heavy duty 5' cord and plug for 120 volt AC current
- Will heat up to 120°F and will not trip GFCI
- Water-resistant

Catalog Number	Size Width x Length	Watts per Matt
8600	12" x 5 foot	150
8602	12" x 10 foot	300
8606	21" x 5 foot	150
8608	21" x 10 foot	300

12" x 5 foot Redi-Heat Heavy-Duty Propagation Mat & RHT-2 Thermostat

21" x 5 foot Redi-Heat Heavy-Duty Propagation Mats

[www.phytotronics.com](http://www.phytotronics.com)

## Redi-Heat™ Thermostats

### RDT-4 Thermostat

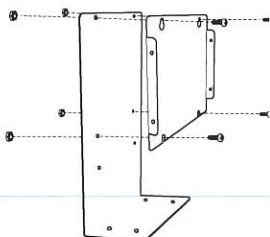

- 120 volts – 2400 watts maximum
- Built in 15 amp fuse (replaceable)
- 4 outlets
- 6' long power cord
- 40°F to 99°F set temperature range
- +/- 1°F accuracy
- Sensor probe 1" long and 5/32" wide, small enough to be used in the cell of a plug tray.
- 52" long sensor cable
- Digital display show set temperature
- Up/down push buttons to set temperature
- Red LED light indicates when heating elements are on
- Comes with 4 self tap screws for attaching thermostat to a surface
- Can be used with optional mounting plate as shown below

**8527 RDT-4 Thermostat**

**255052 15 Amp Replacement Fuse**

### Thermostat Bench Mounting Plate

- Designed for mounting the RHT-2 and RDT-4 thermostat above plant material on the bench
- Position the Bench Plate away from water
- Four fasteners are provided
- Size: 12" H x 5" D x 7" W
- Thermostat sold separately

**8529 Bench Plate**

## Poly Inflation Controllers

### Poly Inflation Controller

- Extends the life of film covering
- Regulates airflow for twin-film greenhouse blowers to maintain pressure between the film layers
- Saves Energy by maintaining pressure between Films
- Helps prevent damage by over or under inflation
- Offers more stability in windy environments
- Features a built in digital manometere
- Offers local humidity and temperature data on the display
- Has a remote temperature located in the inlet air intake
- This unit can be set to run in manual mode to hold a specified pressure setting or auto mode to adjust pressure based on temperature and wind gusts

**1430 Poly Inflation Controller**

## Germination Chamber

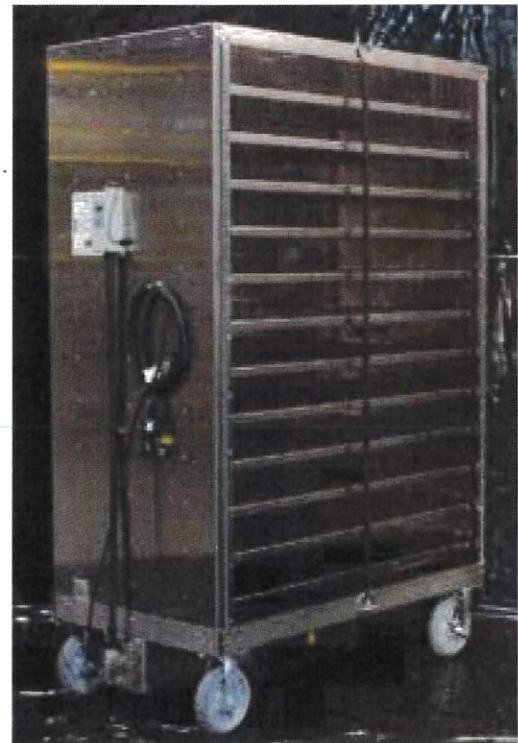

### Features

- Stainless steel and aluminum construction
- Doors swing fully open on piano hinges allowing complete access to interior
- Clear polycarbonate doors
- The circular vents can be rotated from closed to open, providing infinite adjustments
- All ventilation openings are screened
- Water reservoir has automatic water level control for supply hose
- Thermostatically controlled heating element is submerged in water to provide moist heat
- Aluminum heat baffle for more even heating
- Water level sensor turns off heating element before element damage occurs
- GFCI cord end for safety
- Digital display shows temperature within the chamber
- Easy-set thermostat controls heating and ventilation fans
- Shelf Brackets are spaced at 5"
- Metal edged plastic shelves are removable for easy cleaning
- 8" Casters roll smoothly over doorjamb and bumps, 2 locking
- Ships fully assembled and ready to use

Digital Thermostat &  
Fan Control

**GC6 6-Shelf Chamber**

**GC12 12-Shelf Chamber**

### Two Models Available

9720 6 Shelf, 24 Flat 46"H x 51"W x 27"D GC6- 6 shelves, holds up to 24 flats.

9722 12 Shelf, 48 Flat 76"H x 51"W x 27"D GC12- 12 shelves, holds up to 48 flats.

- 9732 Replacement Float Switch-Electric  
420852 Replacement Heat Element  
9733 Replacement Float Assembly - Mechanical  
42085836 Door Snapdown Latch

## Watering Systems

### Hi-Hose Watering System

- Keeps watering hose off of the floor and out of the way
- Labor-saving, cost-cutting, efficient
- Kits available for 50, 75 and 100 foot greenhouses
- Includes: coupled 5/8" "Blue Ribbon" hose w/ anti-kink hangers preinstalled, swivel pulleys, galvanized aircraft cable, wire rope clamps, and a turnbuckle
- 50' kit comes with 65' hose; 75' kit comes with 90' hose; 100' kit comes with two 65' hoses
- Hundreds of systems in use
- Assembly instructions included

**6320 High Hose Kit 50 foot**

**6322 High Hose Kit 75 foot**

**6324 High Hose Kit 100 foot**

75' Kit pictured

\*NOTE: Kit HH-100 requires a center support and either 2 faucets (one at either end); or a splitter at the center of the greenhouse.

### Capmat™ II Capillary Matting

- Made of lightweight, high-strength, polypropylene, polyester, viscose material
- Gray colored mat is resistant to rotting, shrinking, chemical decomposition and being crushed
- Reversible and will not fray after cutting
- Can be used with Agribrom or Zeritol for algae control
- Highly absorbent, permits water to quickly wick to roots
- Mat thickness is 1.0 mm
- Capillary lift is 8.0 cm

#### Capmat II Capillary Matting

**7000 4'x100' roll**

**7001 6'x100' roll**

**7070 4' distribution kit**

**7072 6' distribution kit**

## Misting & Watering Accessories

### Misting & Watering Kit

#### Phytotronics Misting Kits

##### Controller Options\*

1400 Electronic Leaf

1095 Trident T3A 1 Zone Controller

#### All necessary components

- Available in 3 different lengths
- Includes solenoids, filters, nozzles, pvc fittings, cement, wire, pre-drilled pipe and installation instructions
- Designed to cover misting benches from 4' to 6' widths
- Controller sold separately\*

**1300 25' – 1/2" PVC Pipe**

**1305 50' – 1/2" PVC Pipe**

**1310 75' – 1/2" PVC Pipe**

#### DGT Nozzles — 3/8" BWT

Note: Blue and White nozzles should be alternated as their mist patterns differ in height to prevent their mist patterns from striking each other.

- Threads are BWT (British Whitworth Thread)
- Two piece housing with O-ring seal and screen
- Use PVC Nozzle Adapters or the Mini Adapter for installation

#### DGT NOZZLE SPECIFICATIONS for Upright or Invertible Nozzles Pin color indicates model

Nozzle Pin	Application	* Water Above	Nozzle Spacing	Approx. Dia.	50 PSI GPM	72 PSI GPM	Upright	Inverted
White	Mist/propagation-cooling	8"-10"	48"-60"	8'-12'	.53	.66	3002	3038
Blue	Mist/propagation-cooling	12"-16"	48"-60"	8'-12'	.53	.66	3001	3000
Red	Fine Irrigation	12"-16"	60"-72"	14'-18'	.79	1.14	3003	3040
Yellow	Irrigation	14"-18"	72"-96"	18'-22'	1.24	1.66	3004	3042

\* Maximum height the spray will arc above the nozzle top.

# Hozon™ BRASS Siphon Mixer

## With Backflow Preventer

*"The Original, Classic Siphon Mixer!"*

The Hozon should be no more than fifty feet from the nozzle end to work correctly

Analysis	FERTILIZER OUNCES PER GALLON				
	100*	150*	200*	250*	300*
10-30-20	2.0	3.0	4.0	5.0	6.0
15-30-15	1.35	2.03	2.70	3.38	4.05
20-20-20	1.0	1.5	2.0	2.5	3.0

\*PPM of nitrogen desired

- Solid Brass Siphon Mixer with Backflow Preventer
- Spring filter eliminates clogging
- Name brand, quality item
- Time-tested, accurate proportioning device
- Designed for smaller scale growers
- Siphon Mixer proportions at the rate of 1 gallon concentrate to 16 gallons water
- Requires a minimum 35 psi for proper operation
- Available in POP and bulk packaging

**0001 Hozon - Retail Pack**

**0002 Hozon - Bulk Pack**

**0004 Hozon - Springs Stainless Steel**

**0006 Hozon - Repair kit**

A time-tested, accurate proportioning device which dispenses fertilizers, insecticides, fungicides and other water soluble chemicals through a hose.

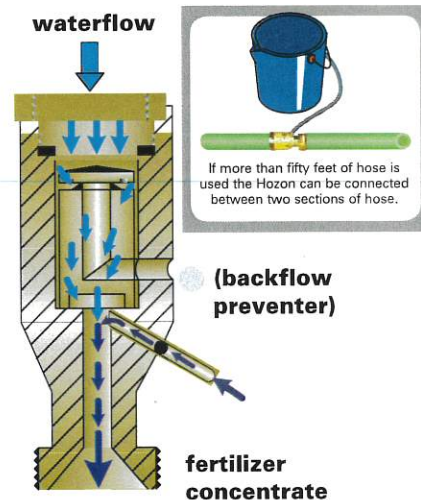

- Proportions at the rate of 1 gallon of concentrate to 16 gallons of water
- One gallon of concentrate is dispensed in 3 to 5 minutes
- 6 gallons per minute minimum flow
- Made of brass
- Hozon needs 35 psi minimum
- Use on maximum 50' length of hose (see illustration at right if more than 50' of hose is desired)

How to prepare a concentrated solution not shown in the chart

- Hozon proportions at 1:16 so concentrated solution should be made at 16 times the recommended rate.
- **Example:** If fertilizer recommendation is 2 TBSP (1/8 cup) per gallon then make the solution 16 times greater than that rate (i.e.,  $16 \times 2 = 32$ ), or 32 TBSP (2 cups) per gallon would be the concentrated rate
- Then, when mixed with water from the hose, the concentrated solution will come out the hose end at the recommended rate

**Bulk Package**

**Repair Kit**

**Hozon™ now with 3/4" BSP Parallel Thread!**  
Used in Australia, New Zealand, etc.

- Solid Brass Siphon 3/4" BSP with Parallel Thread, is also used in Australia, New Zealand, etc.
- Easily and accurately applies soluble fertilizer to lawn, garden and green-house plants.
- Prevents backflow should pressure fail
- Brass body for durability
- Eye-appealing packaging
- Retail display or bulk packaging
- Spring filter to eliminate clogging
- Easy to follow instructions

**0003 Hozon - Retail Pack**

**0005 Hozon - Bulk Pack**

**0006 Hozon - Repair Kit**

## Pestrap™ & Pestick™

### Pestrap™

- Essential IPM tool
- Grids for estimating threshold levels
- Use one card for every 500 sq. ft. of greenhouse
- Non-toxic & extremely sticky adhesive
- Use of gloves recommended
- Pestrap sizes 3" x 5", 4" x 10", 10" x 16"

4620 3" x 5" Yellow

4624 3" x 5" Yellow/Blue

4600 4" x 10" Yellow - general pest monitoring

4605 10" x 16" Yellow - general pest monitoring

### Pestick™

- Pestick™ is clear, allowing attractant colors to be highly visible under the coating
- Apply a thin coating of Pestick™ to colored plastic sheeting, cardboard, glass, wood, metals or other flat or contoured surfaces. Pestick™ can be applied with a small paint roller, hard bristle brush or spatula
- One gallon of Pestick™ will cover up to 500 sq ft of surface area with a medium coating

4000 Quarts - Pestick Compound

4002 Gallons - Pestick Compound

4020 24" x 48" Yellow - HD Plastic Sheeting

## Rooting Hormones

### Rhizopon® AA #1, #2 & #3 Dry Powder Rooting Hormones

- Registered with the US EPA for use in greenhouses and nurseries
- Acts with the plants own natural rooting hormones to aid in root formation by uniform absorption of the active ingredient.
- Ready to use formulation.
- Each dry powder is dyed pink, green, or white-gray to avoid mix ups
- Used by the Dry Dip Method
- Approved Label under WPS for zero-hour Re-entry Interval
- Available in three popular strengths:
  - #1: 0.1% IBA (Pink)
  - #2: 0.3% IBA. (Green)
  - #3: 0.8% IBA. (White-Gray)

0301 #1 Powder, .1% IBA 1 lb

0310 #2 Powder, .3% IBA 1 lb

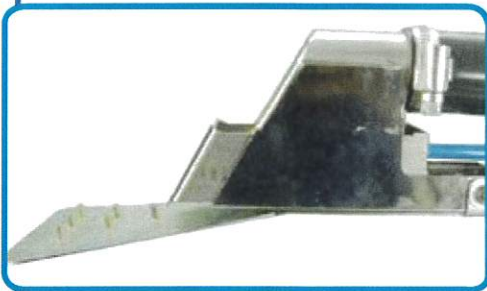

0315 #2 Powder, .3% IBA 25 lb

0320 #3 Powder, .8% IBA 1 lb

0325 #3 Powder, .8% IBA 25 lb

# fertil<sup>TM</sup> Topdresser

Adjustable Granular Applicator

## **Fertil Adjustable Granular Applicator 6400**

**Top-dress with doses up to 4-1/2 teaspoons, up to 1,500 plants an hour!**

A new revolution to top dressing that meets the demand of professional growers, providing accuracy and efficiency. Adjust the dose from 2 to 25 grams and apply granular fertilizer and herbicides in record time, up to 1500 plants per hour.

Accurate applications improve the quality and uniformity of your crop and with the Fertil Dispenser consistency is certain to each plant. Gravity feeds the granular material to the control wand and metered amount is dispensed with the press of a lever.

**Weights 6.8 lb empty • 5 gallon volume**

**(314) 770-0717**
